

Can-shaped led display

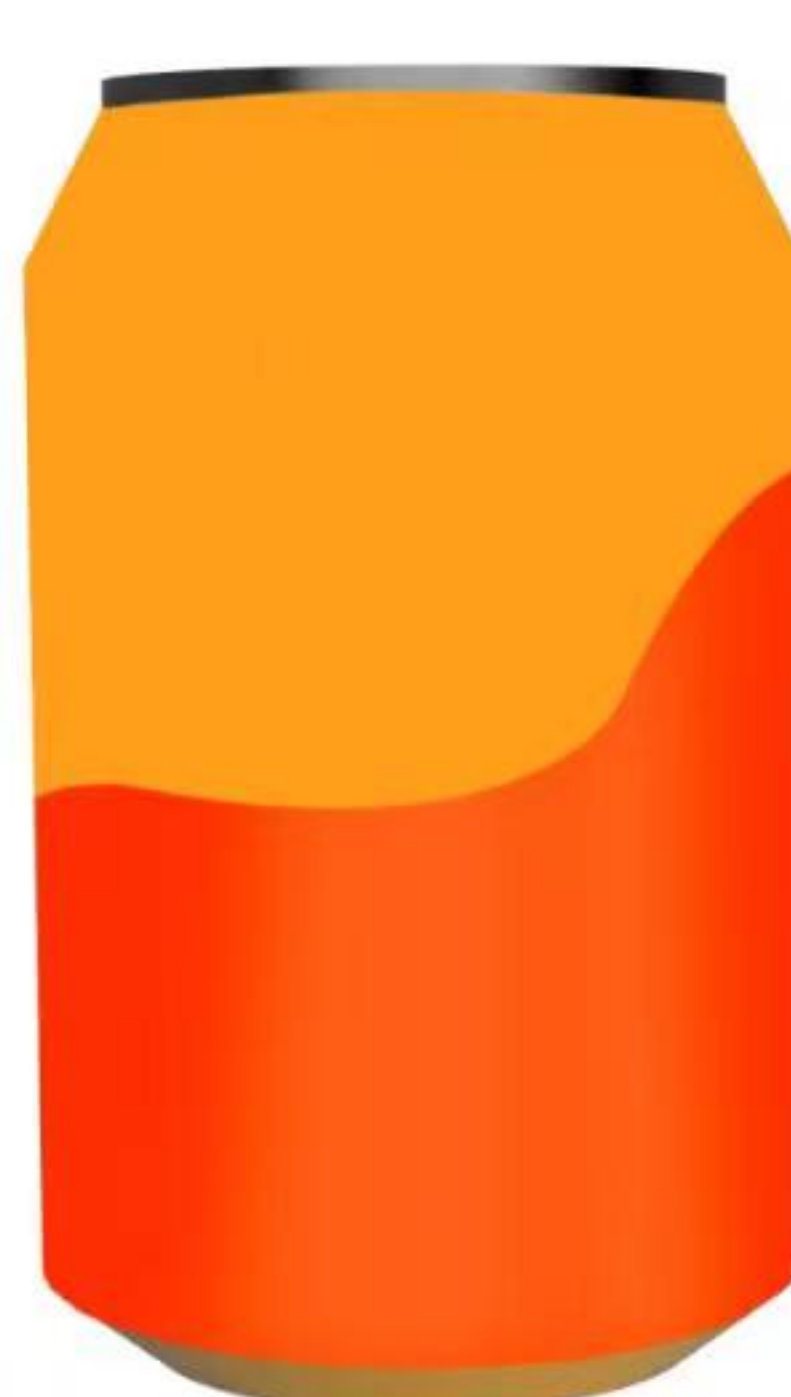

P1.8 LED

CHINA . SHEZHEN

Can-shaped led display

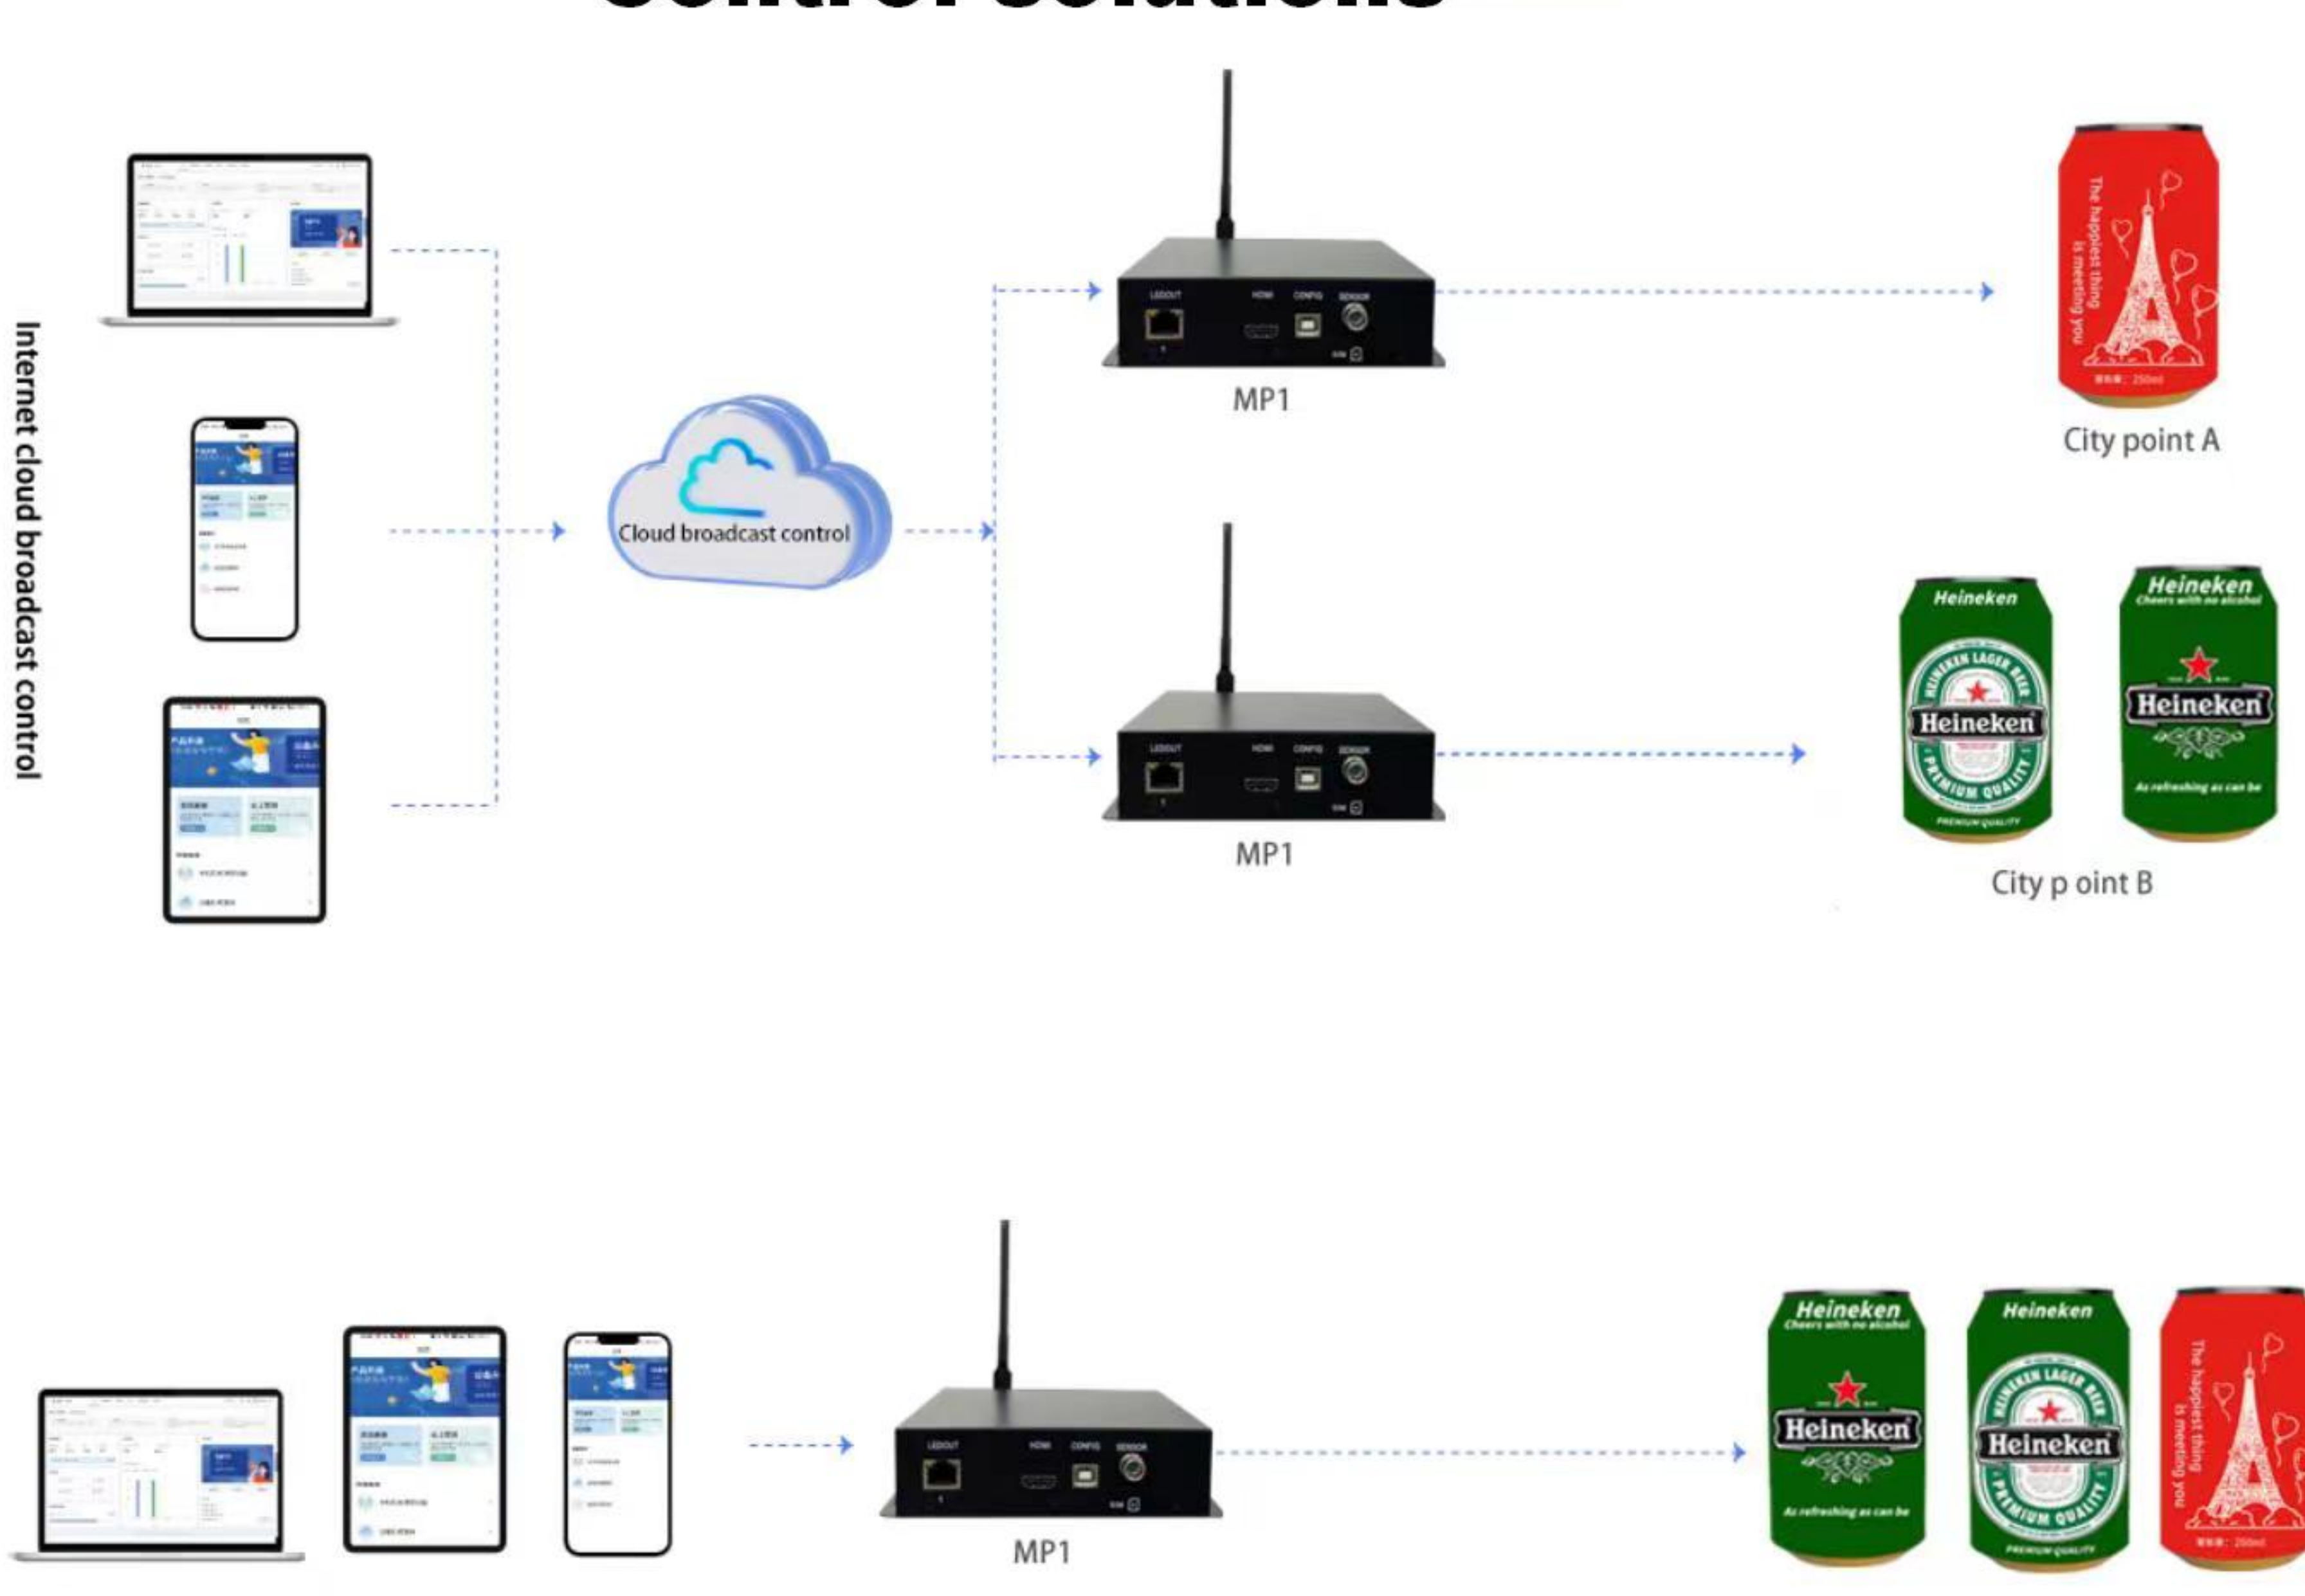

Specifications and models	P1.8LED				
pixel	1280Dot X630Dot				
Refresh	3840Hz				
Size	Diameter767mm x High13410mm				
Control System play box	Processor: Quad-core CPU + GPU Memory: 1G DDR3 high-speed storage Flash memory: 8G EMMC high-speed storage Resolution: Support 1080P HD hard decoding playback				
	Network communication LAN/WiFi/4G access network program partition supports arbitrary partitioning of program windows and arbitrary stacking of windows Video formats: MPG, MOV, MP4, MKV and other common video formats Audio MPEG-1 Layer III, AAC, etc. Image format supports jpg, png, gif, etc.				
Power supply	110-220V	Maximum power	1200W	Average power	600w
Net weight	75kg/pcs		Gross weight	150kg/psc	
Wooden box packaging size	900mmX900mmX1600mm				
Application scenarios	It is widely used in various science and technology museums, museums, exhibition halls, waiting halls, star hotels, high-speed rail stations, subway stations, shopping malls, bars, stages and other places.
